\*Hereditary Cataract (HSF4) - PC

Result: Genotype N/N (free)

Interpretation: The examined dog is homozygous for the intact gene. It is a noncarrier of the defect gene responsible for Hereditary Cataract. This dog is genetically clear and will not be affected. This dog can only pass the normal gene on to all its offspring.

The result is only valid for the breeds Boston und Staffordshire Bull Terrier and French Bulldog.

Referring vet: Christoph Gerhards

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2005. (except partner lab tests).
